Russian – Native

SUMMARY

I am highly skilled and motivated Full Stack Developer. Have an experience in developing and deploying complex web applications. Worked both individually and in a team using the SCRUM methodology. Despite my limited experience in the IT, I have expertise in solving complex problems. I used to run my own business where I was involved in designing and installing security systems. Therefore, I am familiar with stressful situations and how to resolve them within tight deadlines.

PROJECT EXPERIENCE

CarRent, [Link](#) / [GitHub](#) [React, styled-components, Redux]

Webapp when you can find, sort, select according to its parameters, add to favorites cars. App with responsive layout. Used Vite-React, store in Redux, styled by styled-components.
